THANK YOU!!! [This](#) is the most exciting thing I've read in ages. It makes me so happy to see city planning being geared toward more sustainable living. We have to get out of cars, they're ruining our lives in so many ways. I live in downtown LA because I can walk to many places. I love riding my bicycle too, now that we're building more infrastructure for cycling. I couldn't live in LA if I had to drive a car, I don't know how people do it. I've lived here as a motorcyclist most of my life.

Thanks!

Susanna Schick, MBA
